David Ugbero

Software Developer and Server Administrator.

Summary

Software development is my passion! I am a driven tech lover dedicated to learning, creating and teaching programming or enlightening enthusiasts about technology in my society.
With 3 years of total experience, my expertise includes:

• Microservices-architectured REST APIs.
• Nginx and Nginx Plus.
• Docker and Kubernetes.
• Linux Server Administration.
• DigitalOcean droplets and AWS instances management.
• Managed Databases.

_____

Experience

AIICO Capital Ltd
Information Technology Intern
October 2019 - January 2020 (4 months)
Victoria Island, Lagos

AIICO Capital Ltd is a leading secure investments management firm in Nigeria, a multi-asset manager that provides portfolio and fund management services and also fixed income investments.
I worked in it's IT department and ensured:
• Smooth running of all systems, networks and connections.
• All computers are joined to the domain controller.
• Systems setup and network troubleshooting for staffs.
• Server files update.
In the time being, I also built an Investment App for the company to help with many manual processes..

One Kiosk Africa
Software Developer
September 2019 - October 2019 (2 months)
Ikoyi, Lagos

One Kiosk Africa seeks to redefine the E-commerce retail market by improving efficiency using technology to ensure deliver is within 20-59 minutes.

During my time there,

• I led the technical department being it's Tech Team Lead.

• I supervised the development of the company's main software product.

Treskaro Systems & Solutions
Tech Team Lead
December 2018 - July 2019 (8 months)
Benin

Treskaro Systems & Solutions is a Business Supports Services Provider situated in the South South side of Nigeria.

• I led it's IT department during my time there. Our flagship product, Ecoconnect App, a mobile app that seeks to simplify and incentivise waste disposal, made an impact in the city and was made a grant of #500k from the Edo State Govt.

LT Visions Company, Benin-city, Edo state, Nigeria
Back End Web Developer
April 2017 - July 2017 (4 months)
Benin

LT Visions is a Software Company in the University of Benin, Edo State, Nigeria.

• Built a VoIP mobile application that uses Wifi to communicate in a short range.

• Involved in the development of a mobile application similar to YouTube but accessibility is via connection to the company's WiFi.

Education

University of Benin
Bachelor's degree, Computer Science · (2016 - 2020)
